

Maine Association of School Psychologists Professional Standards Committee Meeting February 15, 2020 - 9:00 AM

- **Attendees:** Susan Holinger, Lisa Backman, Danielle Williams
- **Professional Evaluation Tool:**
 - Committee members have pulled together several evaluation tools currently in use around the state and nationally. Committee members spent some time reviewing these documents prior to today's meeting.
 - Discussed which tools were preferred by those on the committee, including pros/cons of each tool. Discussed how they might fit for schools using Marzano, Danielson, or other professional evaluation models. Discussed how to embed self-evaluation, SMART goals, evidence of completion, and other important components.
 - Chose one model to use as a template. Committee members then spent time formatting this model, adding in components from other tools that were desired to have as part of our tool, including aligning the tool with current NASP standards.
 - *Committee will meet again to review any new information that members obtain from their attendance at next week's NASP convention, and will update this tool accordingly before sharing with the Executive Board in preparation to share with MASP members.*
